

Putney CC Covers Procedures

When not in use

Store on the north west corner of the ground.

To prevent the build up of stagnant water in the gutters, remove the bungs, storing them above the red tin in hut,

and disconnect the hoses. Lay hoses tidily in the guttering, securing with the elastic cabling.

Using the covers

Use the small brush to clear the covers, guttering and drain holes of debris *before* moving the covers across the outfield to the square.

Otherwise the debris and leaves will be brought to the square

Align with the strip and roll into place.

Attach one bung **and** one hose to each side of each cover

otherwise the cover will leak close to the strip.

Attach securely the overflap across the join of one cover to another.

Comms

Saturday skipper must liaise with groundsman on whether or when covers are required.

Sunday skipper to instruct Saturday skipper on Sunday's requirements.

Sunday team are to ensure that the covers are securely away after their game.
